

Features

It is a new concept of air purifier that generates negative ions to eliminate airborne bacteria, viruses and various harmful substances.

Antivirus Function
Elimination of influenza virus

Anion Air Cleaner
Emanation of more than 10 million negative ions

Air Purification System
purifying and disinfecting functions

Economical Function
Non-disposable
no need to change filters

Various Germs and Harmful Substances that Threatens Health > **Eliminates 99.9%**

Influenza virus

Causative agent of acute respiratory diseases.

E. coli

Infectious substance that causes disease includes cystitis, pyelitis, septicemia and etc.

Staphylococcus aureus

Highly toxic substance is the culprit of food poisoning that cannot be destructed by boiling.

Salmonella

Causative agent of food poisoning that also causes typhoid diseases for humans and animals.

Superbacteria	Pneumonia	Pseudomonas aeruginosa	Bacillus
Vibrio parahaemolyticus	Listeria monocytogenes	Mold	Benzene
Toluene	Trimethylamine	Ammonia

Anytime, Anywhere!

NBREDS SMART APPCESSORY AIRCUBE ECO

Air Cube eco

Air purification

Simple Design

Light Body

Easy Control

Effect of Negative Ion

Negative ions are naturally found in places like forests, mountains, waterfalls and etc. It allows you to feel fresh and revitalized.

It increases electron concentration in the blood and suppresses active oxygen, aging, stress levels to strengthen your immune system.

Increase the oxygen holding capacity of blood & metabolism

Air purification & antibacterial function

Vitalize cells & enhance resistance

Promote brain development

Comparison Table of the Air Purifier's Negative Ion Rates

* International standards on ionization
- Concentration of more than 100,000/cc negative ion from a negative ion generator at a distance of 1m.

NBREDS
Air Cube eco

Aircube eco can be installed in many places including ordinary households, children's study room, living room, kitchen, bathroom, car interior, workplace, anywhere you wish to have germ-free and fresh air.

Specification

Model	Aircube eco
Product Name	Air purifier
Rated voltage	220 V~, 60 Hz, 1.5 W
Manufacturer	NBREDS
Country of manufacture	Republic of Korea
Method	Plasma ion injection
MEASSURING condition	Temperature 20~25 °C , humidity 50~60%
Amount of negative ions	1,997,200 at 23Cm(Korea Far Infrared Association) →About 110,000 at 1m
Amount of ozone(O3)	0ppm(Korea Conformity Laboratories)
